## B. ABSTRACT

1	B. <u>ABSTRACT</u>
2	The subject invention is a portable structure, generally in the form of a portable man
3	or other similar member, that can be moved or transported from place to place to be used
4	in a temporary manner and placed on the ground for use in the process of facilitating the
5	implementation of field exercise tests of individuals who are suspected of criminal or other
6	activity such as driving under the influence of alcohol, such mat comprising in general a flat
7	flexible mat-like member that can be placed flush against the ground for temporary use, such
8	mat having an upper surface with demarcations thereon for giving a person walking over the
9	upper surface of the mat.
